WORK EXPERIENCE

Le Wagon Brussels

Developer

Completion of 2 projects for the Le Wagon Bootcamp.

The first project consisted of creating an Airbnb clone in 5 days with our 2 man team. The result can be seen at <https://airbibooks.herokuapp.com>.

Our second project, "Biqom" (www.biqom.herokuapp.com), allows users to incorporate good habits into their lifestyles. Through the platform's daily challenge system, the user receives a different challenge each day for the activities he/she selected. Through this, we aim to add a fun factor to repeating an activity while shaping it into a healthy habit. From saving money, a better morning routine, to picking up yoga. For this project I combined all my Ruby on Rails, JavaScript and front-end skills
